

# HealthTALK

FALL 2020

## Time to immunize?

Immunizations help to protect against preventable diseases. If your child missed getting any vaccines this year, it's not too late to make them up. Schedule an appointment right away if your child is due for any shots. If you're not sure if any were missed, you can call your child's primary care provider (PCP) to find out. Make sure the entire family gets a flu shot this fall, too!

## Keep calm.

### Finding the right treatment for ADHD.

Children with attention deficit hyperactivity disorder (ADHD) may have trouble paying attention or controlling their behavior. Or they may be overly active. If your child has ADHD, their provider may suggest behavioral therapy and/or medication.

There are several kinds of medicines that treat ADHD. It may take a while to find the best one for your child. Your child may need to change medicines or dosages a few times. Some medicines may not help. Others may cause side effects. A dose may be too low or too high. That's why it's important for children who take ADHD medicine to see their doctors often for follow-up care.

## Telehealth visits.

You may have concerns when it comes to visiting your doctor in person these days. But it's important to continue to meet with a health care provider and stay on top of your health. Scheduling a telehealth visit can help you do this from the safety and comfort of your home. You may also be able to meet with a provider online for urgent needs 24 hours a day, 7 days a week.

### What is telehealth?

Telehealth is a visit with a provider using a computer, tablet or phone instead of going into the doctor's office. Ask your provider if they offer telehealth services. Telehealth can be a good option for:

- Asking questions about your symptoms.
- Getting advice to help manage your condition(s).
- Getting medicines prescribed and sent to your pharmacy.

If you're not sure if a telehealth visit is the best option for you, call NurseLine first to get advice at no cost to you. Nurses are available 24 hours a day, 7 days a week. Just call **1-866-351-6827, TTY 711**, toll-free.

## Take care of mental health.

It's perfectly natural for kids to feel anxious, stressed or frustrated when there is uncertainty in their lives. Here are 4 steps you can take to help your child cope during stressful times.

- 1. Spend quality time together.** Make sure your child knows they are not alone. Plan regular activities you can do as a family. Reading a book together keeps their mind engaged. Going on a walk together is a good and easy way to get some exercise.
- 2. Set a good example.** Show your child ways to stay healthy. Keep up with healthy eating habits, and get plenty of rest and physical activity.
- 3. Share information.** Talk with your child about the ongoing effects of COVID-19. Listen and answer any questions they have.
- 4. Stay connected — but set boundaries.** Use technology to stay in touch with family and friends. Use video chat to “see” people if you can't meet up in person. But set limits for screen time and social media use, as too much can lead to more stress and anxiety.

**Take care.** Find articles, self-care tools, caring providers, and more mental health and substance use resources at **LiveandWorkWell.com**.

You can also call our toll-free help line at **1-866-342-6892, TTY 711**.

# Test your COVID-19 and flu IQ.

## Know the myths and facts.

We're challenging UnitedHealthcare Community Plan members to stay healthy. Do you know what actions you can take to protect yourself and your family from COVID-19 and the flu? Test your knowledge of the myths and facts below.

### True or False?

- 1** COVID-19 mainly spreads through contact with surfaces.

**False.** COVID-19 is mainly spread from person to person. It spreads through respiratory droplets that travel through the air when people sneeze, cough or talk.

- 2** If I got a flu shot last year, I still need to get one this year.

**True.** Your immune protection from the flu vaccine decreases over time. Everyone aged 6 months and older should get a flu shot each year.

As fall and winter approach, it's important not to forget about the seasonal flu. Be sure to get your flu shot this season. Getting your flu shot helps protect you and your community from getting sick.

- 3** To be effective, you need to wash your hands for at least 20 seconds.

**True.** Wash your hands for at least 20 seconds every time you return home from a public place. Also wash your hands after blowing your nose, sneezing or coughing. Try singing "Happy Birthday" in your head from beginning to end twice while you wash your hands. This will ensure you spend at least 20 seconds washing.

- 4** Hand sanitizer works better than traditional soap because it has alcohol in it.

**False.** Handwashing is the gold standard. It is more effective than hand sanitizer at removing and killing viruses and germs on your hands. Consider hand sanitizer a portable option for times when you don't have access to soap and water.

**It's your best shot.** There is no cost to you for flu shots. You can get one at your primary care provider's (PCP's) office or any clinic or pharmacy that accepts your plan. Visit [myuhc.com/CommunityPlan](https://myuhc.com/CommunityPlan) to find a location near you.

**Monday–Friday, 8 a.m.–5 p.m.**

# Pasta party.

## Try this delicious recipe.

Make pasta for dinner with this family-friendly recipe. Add wagon wheels and easy ingredients like frozen spinach and nuts, and you can't go wrong. This recipe serves 6 (and you will likely have leftovers).

### Ingredients.

- 1 pound wagon wheel pasta (can be substituted for other shapes and/or gluten-free pasta)
- 3 tablespoons olive oil
- 3 tablespoons garlic, thinly sliced (8–10 cloves)
- ½ teaspoon kosher salt
- 1 teaspoon crushed red pepper
- 1 pound frozen spinach (defrosted)
- ½ cup Parmesan cheese, freshly grated
- 2 tablespoons pine nuts, toasted (if pine nuts aren't available, try almonds or cashews)

### Instructions.

1. Cook the pasta according to the package.
2. If using raw nuts, spread them in a single layer on a microwave-safe plate. Microwave on full power for 1 minute. Stir nuts and continue microwaving in 30-second periods until nuts are golden brown. This can be done in advance.
3. While the pasta is cooking, heat olive oil over medium heat in a large skillet. Add the garlic, salt and crushed red pepper. Cook until the garlic starts to turn golden, about 3 minutes.
4. Add the spinach and combine until heated through.
5. While heating the spinach, drain the pasta and reserve 1 cup of the pasta cooking liquid. Put the hot pasta water into the pan, add the drained pasta and stir to combine. Top with Parmesan cheese and toasted nuts.

# COVID-19

## Important Message from UnitedHealthcare on Coronavirus (COVID-19)

Your health and wellbeing is our number one priority. That's why we want to make sure you stay informed about Coronavirus (COVID-19). We're working with and following the latest information from the Centers for Disease Control and Prevention (CDC). We're also in touch with state and local public health departments. For the most up-to-date information and resources about prevention, coverage, care and support please visit [UHCCommunityPlan.com/covid-19](https://UHCCommunityPlan.com/covid-19).

## How can I protect myself from COVID-19?

The best way to prevent illness is to avoid being exposed to this virus. As with any potential illness, like the flu, it is important to follow good prevention practices, including:

- Hand washing with soap and water for 20 seconds or use of alcohol-based hand sanitizer with at least 60% alcohol if soap and water are not available.
- Do not touch your eyes, nose and mouth with unwashed hands.
- Try to stay away from people who might be sick.
- Do not share cups or eating utensils with people who are sick.
- Clean and disinfect often touched surfaces.
- Cover your nose and mouth with a tissue when you cough or sneeze, and then throw the tissue in the trash.
- While a flu shot does not stop COVID-19, it's still good to protect yourself against the flu. Contact your primary care provider and schedule your flu shot.

## Stay informed on the latest advice:

- For the most updated information about COVID-19, visit the CDC's COVID-19 page [cdc.gov/coronavirus/2019-ncov](https://cdc.gov/coronavirus/2019-ncov)

## Five steps to wash your hands the right way

Handwashing is one of the best ways to protect yourself and your family from getting sick. During the COVID-19 pandemic, keeping hands clean is especially important to help prevent the virus from spreading.

Washing your hands is easy, and it's one of the most effective ways to prevent the spread of germs. Clean hands can stop germs from spreading from one person to another and throughout an entire community—from your home and workplace to childcare facilities and hospitals.

### Follow these five steps every time

1. Wet your hands with clean, running water (warm or cold), turn off the tap, and apply soap.
2. Lather your hands by rubbing them together with the soap. Lather the backs of your hands, between your fingers, and under your nails.
3. Scrub your hands for at least 20 seconds. Need a timer? Hum the “Happy Birthday” song from beginning to end twice.
4. Rinse your hands well under clean, running water.
5. Dry your hands using a clean towel or air dry them.

Learn more about regular handwashing at [cdc.gov/handwashing](https://www.cdc.gov/handwashing).

UnitedHealthcare Community Plan does not treat members differently because of race, color, national origin, sex, age or disability.

If you think you were not treated fairly due to race, color, national origin, sex, age or disability, you can file a grievance. File it with:

Civil Rights Coordinator  
UnitedHealthcare Civil Rights Grievance  
P.O. Box 30608  
Salt Lake City, UTAH 84130  
**UHC\_Civil\_Rights@uhc.com**  
**1-866-292-0359, TTY 711**

You may file on the phone, in person or in writing.

If you need help with your grievance, call **1-866-292-0359, TTY 711**. Hours are Monday to Friday, 8:00 a.m. to 5:00 p.m.

You can also file a civil rights complaint with the U.S. Department of Health and Human Services.
